TOBACCO AND CORN CLUB WINNERS at the county 4-H club roundup on Tuesday are, left to right, Mark Nestleroth, Manheim R3, Tobacco Filler champion; Randall Edwards, Ephrata R1, Tobacco Wrapper champion, and Paul Trimble, Quarryville R1, corn champion. L. F. Photo.

Disaster Committee Asks Emergency Status Review

The Lancaster County drought Disaster Committee Thursday decided to request a disaster area rating for part of the County

The request will be forwarded to the state disaster committee in Harrisburg, along with a request for the committee to come here for on-farm inspections to determine the need for emergency status

County Agent, Max M Smith a committee member, said the decision was reached this week since a request for disaster rating for the entire county was refused in September. Smith said several requests from farmers on the northern section had prompted the committee to meet and re-evaluate the situation.

All the townships north of the Lincoln Highway from Lancaster to Columbia and north of Rt 23 from Lancaster to New Holland are included in the request, Smith said

If the request is accepted

Manheim Farm Bureau Closing Is Announced

Lancaster County Farm Bureau Cooperative Association closed its Manheim Branch as of January 2, president Willis Esbenshade told the approximately 600 patrons at the annual meeting in Solanco High School, Quarryville Tuesday

Esbenshade said the board of directors decided to consolidate the Manheim and Lancaster branches since approximately 75 per cent of the Manheim business is in bulk feed, most of it sold directly to the farm The county organization does not own the milling facilities at Manheim, but rents them from the Pennsylvania Farm Bureau Cooperative Association. He said, "We do not know how we could develop the limited location in a manner that

County Farmers Association Officers Confer In Washington

WASHINGTON — Five Lancaster County Farmers' Association leaders were told last week by the American Farm Bureau Federation that an all out effort will be made to protect Type 41 tobacco from tariff cuts by placing it on the reserve list, meaning items not to be negotiated

Headed by Harold Rohrer, Lancaster, PFA State Board Member, J Robert Hess, Strasburg, Lancaster County Farmers' Association President, Noah W. Wenger, Stevens; Clyde Wivell, Columbia; and Herman A. Shirk, Quarryville, the Lancaster delegation met December 27 in Washington, D. C. with J. C. Lynn, AFBF Legislative Director, Herbert Harris, Assistant AFBF Legislative Director in charge of foreign trade; Robert Steele, PFA Research Director; and Hollis A Hatfield, PFA Administrative Secretary

"Not generally known to Lancaster tobacco growers", said Hess, "is the fact that the recent hearings in Washington before the Trade Information Committee were made possible by the AFBF". The Administration's trade bill of 1962 contained no "escape clause" for distressed

Trimble Wins Corn Club Trophy Again

Paul D Trimble, Quarryville R1, picked up his fifth purple rosette in the Lancaster County 4-H corn club competition Tuesday

Trimble, the 19 year old son of Mr and Mrs Daniel Trimble, won the county championship in 1956, 1959, 1960 and 1962 He won reserve champion honors in 1955, 1957, 1958 and 1961.

Trimble, a 1962 graduate of Solanco High School showed 10 solid, uniform ears of Pioneer 3131 to become the

Two Members Split Tobacco Club Awards

County 4-H tobacco club honors were divided by two club members Tuesday at the annual roundup held at the Bayuk Cigar Company warehouse, 850 N. Water Street, Lancaster

Mark Nestleroth, Manheim R3, 19 year old son of Mr. and Mrs. Carl Nestleroth, in his eighth year of tobacco club competition won the grand championship in the filler division of the show.

Nestleroth is not a newcomer to the winner's circle. He became the first exhibitor to take both filler and wrapper championships in 1959

Wrapper honors went to 15 year old Randall Edwards, son

MEMBERS OF THE LANCASTER County Farmers Association who were in Washington, D. C. last week to confer with American Farm Bureau Federation officials on the tariff hearings currently in progress. They are, front row, L. to R., J. Robert Hess, Strasburg, Lancaster County Farmers' Association President; Harold Rohrer, Lancaster, PFA State Board Member; Clyde Wivell, Columbia. Back row, L. to R. Herbert Harris, AFBF Assistant Legislative Director, J. C Lynn, AFBF Legislative Director; Noah W. Wenger, Stevens; Herman Shirk, Quarryville; and Robert Steele, PFA Research Director, Camp Hill.

Poultry Auction Will Continue Despite Loss Of Two Consignors

Two of the major consigners of broilers at the Lancaster Poultry Center announced this week that they will not use the facilities of the weekly auction after January 20.

Poultry Exchange Directors at a meeting Thursday night decided to continue the auction on a regular basis after the feed firms of Miller and Bushong of Rohrerstown and D E Horn and Company of York notified the association of their decision to market broilers directly to a processing plant

A spokesman for the Poultry Exchange said the weekly auction will continue to operate and has been given assurances by buyers that they will support the sales No changes in listing or sales dates are anticipated

A reliable source estimated that broilers from the two feed firms has made up 75 to 80 per cent of the consignments during the past year.

The exchange official said the board feels there is still a need for the auction and that it can render a real service to the small, independent growers and buyers.

FIVE-DAY WEATHER FORECAST

Temperatures during the next five days are expected to average three to 10 degrees above the normal range of 39 in the afternoon and 24 at night. Little day to day change with mild temperatures Sunday through Tuesday, colder next Wednesday. Some snow flurries are expected in the northern area Saturday with more general precipitation falling as rain Tuesday. Snow flurries are expected again on Wednesday.

DEKALB SUDAX Brand SX-11
Is Excellent For Hay

DeKalb Sudax SX-11 is now being used for hay as well as greenchop and pasture.

Here is what one farmer has to say about his experiences with SX-11 for hay:

"My 3½ acres of SX-11 produced twice as much hay as 10 acres of alfalfa, both taken as second cutting.

On May 20th I planted my SX-11 at about 50 lbs. per acre. It was very dry, but by the first week in July, I was greenchopping. On August 15th I cut it again, only this time for hay. I crushed right after the mower and baled it two days later. The yield was about 2 tons per acre and quality was very good. I didn't think cattle would prefer SX-11 hay to other good hay, but they do. I believe it now after seeing it. I intend to use more SX-11, because of its versatility in uses and its tremendous yielding ability."

Signed — Henry Reifsnider, Sept. 9, 1963

For the finest quality hay, SX-11 should be cut at about waist-level. At this stage of growth, SX-11 is near maximum protein level, and is tops in appetite appeal. The use of a crimper or crusher is important to aid in drying. Although this field of SX-11 was not fertilized after the first cutting, DeKalb recommends that after each chopping or harvesting of a crop a top dressing of 30 to 70 pounds of "N" be added.

From Where We Stand . . .

Farming - Year 2040 Style

"Now it seems this farmer had a dream one night," said the old man, "and there he was living in the year 2040 A.D., and darned if there wasn't the strangest things going on."

"What was it like, grandpa?" asked the smallest of the two listeners. "What was the farms like?"

"Sonny," he said, "There just warn't none to speak of. You see, the suburbs had moved so far out the farm land was all buildings. They was a few farms on top of some of the buildings", he added.

"Grandpa", said the little girl dubiously. "How could the cows live on the buildings? How could they?"

"Cows" said grandpa. "Who said anything 'bout cows? Why they'd all been butchered some years before and all the milk — yessir every last drop come from them manufacturing places — you know them plants that saved the farmer way back."

"Grandpa."

"Yessir, little doll, they had machinery that could do just about anything — why it tuk all the guv'ment butter and all the guv'ment cheese and powdered milk — all the surplus that'd been hangin' round for years — and they shoved this stuff into the machines and what'dya think cum out?"

"Milk," said little doll. "But what about when they used it all up? What about that?"

"It would take so many years they figured they'd have somethin' else by then," said grandpa.

"Grandpa," said little doll, again.

"Anyhow," continued grandpa, "On the surface it looked like all the problems is licked — no surplus — no drought, cause there warn't nothing to dry up, no disease, cause there warn't no cows, and best of all the farmer still got his milk check from the guv-ment — cause this old stuff had come from his cows."

Grandpa paused and scratched his head. "But it warn't so at all," he said. "Not for a momment."

"What was wrong, gramps?" asked the little boy.

"In the fust place — where could city people go on the week-end? They was all city folk, now, 'cept a few. And some of them on the buildings would forget they was up there and go plowing right off the buildin'. Then, they was a lot of politicians that didn't know what to talk about, 'cause they warn't no farm problem and the guv'ment jobs were gettin' less and less. Even the secretary of agriculture was lookin' for a job."

Grandpa looked slyly at his two listeners and folded a wad of tobacco into his mouth.

"Wust of all," he said, "Was the eatin'. All the wheat surplus and such had been made into pills, and that's all anybody et. The wimmen folk had no cookin' to do so they set around all day watchin' cineramavision, that was the latest household entatainment, and they got fat and lazy and it wade them pretty ornery. On Sunday they'd just roll a few extra large pills out an' go back to the livin' room."

"I don't like it. I don't like it at all," said little doll. "I don't wan't to get fat and lazy."

"I don't like pills," said the boy.

"I'm glad it was just a dream, grandpa," said little doll. "That couldn't really happen, could it grandpa?"

"Well, now, little one," said grandpa, "I guess mebe it might not happen just like that. But on the other hand — the way things is going and all — everythin' is sure progressin' awful fast."

"Grandpa!", said little doll.

By EDWARD C. O'BRIEN
In Metropolitan Milk Producers' News

HEADACHY HENS TAKE HEART

A university of Arizona release says: "Some chickens live a troubled life. Give them aspirin to ease the pressures and they'll lay more eggs." It's pointed out that this is one conclusion one might reach from research results of Arizona poultry scientists B. L. Reid and B. J. Hulett. They found that adding acetyl salicylic acid (common aspirin) to a poultry ration resulted in hens laying nearly 6 percent more eggs; they don't know why at this time.

PAYS TO ADVERTISE

If the challenge is one of promotion — and it is — then the issue seems to be plainly drawn. Just two of milk's soda pop competitors this year will spend more than $60 million to tell the story of their products. All competing beverages, lumped together, probably would show a total advertising budget of many times that $60 million figure.

By comparison, the principal spokesman for the American dairy industry, will be spending little more than $7 million to tell the story of milk. The point here is obvious.

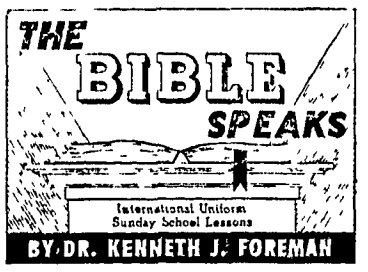
Penna. Secretary of Agriculture



Jesus' Own Mother

Lesson for January 5, 1964

Background Scripture: Matthew 12 46-50, 13:53-58, Luke 2 19, 39-52; John 2:1-12, 19:25-27, Acts 1 14.
Devotional Reading: Luke 1 46-55.

JESUS is the hero of the New Testament. Other characters meet us in its pages, but no writer in the New Testament takes an interest in anyone else except as they have some connection with the life of Jesus himself. So Mary, his own mother, appears in the Bible not as Queen of Heaven or the Co-Redemptrix of the world, but as the simple, good young woman who was the wife of a village carpenter and the mother of Jesus of Nazareth. We should like to know more about her than we do. She was probably quite young, and also probably not given what we would call a higher education. Yet we know that she was the woman to whom God entrusted Jesus. The church through most of its history has believed that Joseph was not the real father of Jesus; but the church has never thought of denying that Mary was his real mother.

Dr. Foreman

Mary pondering

Mary was a remembering woman. She thought long about the meaning of things—that is what "pondered" means. She took time for events to make their impression on her mind. We know she was a woman of poetic mind. Most of the words attributed to her are in poems, presumably made up, perhaps on the spur of the minute. She was familiar with that great poetry collection and hymn book of her people which we know as the Book of Psalms. She was a woman who loved those Psalms and memorized them and wove them into the fabric of her own mind and memory. She remembered the singing angels, and the angel who first visited her, and the coming of the Magi. She remembers her son as a small boy, and that notable trip to Jerusalem when he was 12 years old. She was not a woman to go talking all the time with her neighbors. She did not wear her heart on her sleeve She was not one to live only on the surface of things. She was no doubt a busy and often weary woman. But still she had time to furnish an inner chamber of the heart, a secret world where the wonders of life were cherished and re-lived.

Mary commanding

Jesus as a boy was not given special privileges except no doubt those of any oldest son. One special privilege he did not have: he was not allowed to disobey. We read that he "was subject" to his parents, that is, they directed him, gave him commands. Perhaps the burden of this fell on Mary, for Joseph drops out of the picture and is not heard from in the story after that visit to Jerusalem. Mary was what the poet describes, "A perfect woman, nobly planned, To warn, to comfort and command."

In the story John tells of the wedding at Cana, we hear Mary commanding the servants to do whatever her son directed. This was a turning-point in her life, perhaps. At any rate, somewhere along the road Mary knew the moment which comes to every mother, no matter how loving and good, when she has to let go her control, when her child looks at her with level eyes, the child no longer a boy, a youth, but a man.

Mary praying

The last picture we have of Mary in the New Testament story is in a prayer meeting. It was in an "upper room," perhaps the very room in which Jesus, six weeks before, had held the Last Supper on the night in which he was betrayed. If you can imagine what that must have meant to Mary's imaginative mind, you may well suppose that Mary was praying as never before. Yet no person ever comes suddenly to a deep prayer life. We may well be sure that Mary had been a woman of prayer through the years. This is important; but even more important is the effect on the growing child Jesus. If he was a real person, and Mary a real mother, we can be sure he learned about prayer first where most of us learn it, at our mother's knees. The man Jesus knew more of life, its joys, riddles and agonies, than the child Jesus. But the faith he breathed in by his mother's side would last till his dying hour.

Now Is The Time . . .

BY MAX SMITH

MAX SMITH

To Order Certified Seed

Many farmers will be ordering their seed supply during the winter months. Certified seed usually costs more than ordinary seed, but it's worth the difference and in most cases will end up to be the cheapest. Certified seed has the backing of purity, expected performance and freedom from weeds. With other seeds we have no guarantee of any of these things and could be buying trouble and poor yields Be sure you know what you are planting.

To Handle Livestock Carefully

Returns from feeding cattle or hogs are at such a low figure that every possible management practice should be used to reduce losses and bruises In hogs more than half the bruises occur on the hams and in cattle the loins get injured most of the time Both of these areas are in the regions of the highest priced cuts Livestock should be handled quietly, trucked gently, with a minimum of injury to any part of the body.

To Kill Rodents

Snow cover has been with us now for several weeks Rats and mice have been chased from the fields because of the lack of food, farm buildings will be their winter home if farmers permit the intrusion The first step is to clean up and eliminate all possible nesting or harboring places; then use poison bait stations to kill the rodents. These rats, and mice do millions of dollars of damage each year on our farms and good farm management will make this saving.

Protect Lawn

If we have much snow this winter, we can expect snow mold in lawns or fine turf where the disease has been a problem, warns A H. Bauer, extension plant pathologist, at The Pennsylvania State University. Damage from snow mold is reduced or prevented by not piling snow on the lawn and by treating areas with chemicals. Where snow mold has been a problem and much snow falls, see your county agent for further information on snow mold control.

(Continued from Page 1)

producer to air their grievance or to seek relief from imports. The AFBF was instumental in having the "escape clause" included in the 1962 Trade Act

Another protective device for tobacco growers, inserted into the 1962 Trade Act by the AFBF, stipulates that the tariff Commission recommendations, not acted upon by the President, must be explained to Congress by the President, and then Congress is free to legislate. Under the original bill, tobacco growers, for example, could testify, the tariff Commission could recommend, and if the President did not act no action would be forthcoming

"Probably the best known AFBF action", said Hess, "relating to the present trade act, is the market protection provision making it possible for the President to raise tariffs on imports where loss of U S markets has occurred because of a foreign country raising the tariff on U S. products".

The so-called "Chicken War" was made posssible by the 1962 AFBF market protection amendment. Under this amendment, the U S is raising import duties on brandy, trucks, and starches from Europe in retaliation for the damage done to U S. poultrymen because of loss of markets

Zero Tariff Unlikely

Rohrer, upon returning from Washington, emphasized that Lancaster tobacco growers can be assured that the tariff levy will not be cut to zero as some county tobacco leaders contend.

"Examination of the 1962 Trade Expansion Act clearly shows", said Rohrer, "that zero tariffs can be considered only upon request of the industry In our case, this is not even a probability".

Foreign Trade Essential

Testifying before the Trade Information Committee on December 20, 1963 the AFBF pointed out that exports represent a significant part of the total market for our agricultural products — one acre of every five cropland acres harvested produces for exports Also, many supplies necessary for agricultural production in the Unted States are imported

Covered Dish Specials

By Mrs. Richard C. Spence

SPENCE

"What shall I take for the covered dish supper tonight?" This is an often-asked question, sometimes it is easily answered but then again we go through the cookbook from cover to cover trying to find something different to take Here are some suggestions that might be of help to you.

A meat loaf is always a good main dish, carries well, and can be made in a variety of sizes just by varying the amount of ingredients Meat loaf can be made from almost any kind of ground meat and the varieties are almost endless Here is one that should go well in almost any group.

SAVORY MEAT LOAF

1 pound ground beef
1 pound ground pork
1½ cups crushed shredded wheat (about 5 biscuits)
1 cup canned tomatoes
1 cup chopped onion
¼ cup chopped green pepper
2 eggs, beaten
1 teaspoon salt

Mix all ingredients. Bake in moderate oven (350 degrees) 1½ hours. Garnish with mashed potatoes and serve with your favorite vegetable. Makes 6 to 8 servings.

* * *

CRABCAKE CASSEROLE

1 can (10½ ounces) condensed cream of celery soup
½ soup can of milk
2 cans (6½ ounces each) crabmeat, coarsely broken and cleaned
⅛ teaspoon cayenne pepper
⅛ teaspoon dry mustard
1 teaspoon Worcestershire sauce
¼ cup finely chopped onion
1 egg, slightly beaten
1½ cups finely rolled Ritz cracker crumbs

Combine cream of celery soup and milk Heat and stir till well blended. Add remaining ingredients, reserving ¼ cup cracker crumbs Turn into a greased 1-quart casserole and sprinkkle top with crumbs Bake in moderate oven (350) degrees) 40 minutes (Tuna can be substituted for crabmeat, if desired.) Serves 6.

* * *

CHINESE-STYLE VEAL STEW

1 pound cubed veal
¼ pound cubed pork
1¼ cups water
½ teaspoon salt
6 tablespoons (¾ stick) butter
1 cup diced celery
½ cup minced onion
6 tablespoons flour
½ teaspoon salt
2 tablespoons soy sauce
2 cups green beans
1 5-ounce can Chinese noodles, heated

In saucepan combine veal, pork, water and salt Heat to boiling; reduce heat, cover and simmer until meat is tender (about 1 hour). Meanwhile in saucepan melt butter; add celery and onion. Saute until vegetables are tender; remove from heat. Blend in flour, salt and soy sauce, stir in undrained green beans and cooked meat Cook over medium heat, stirring constantly, until mixture thickens Serve over Chinese noodles

NOTE: If desired, pour meat mixture into 8-inch square baking dish; top with Chinese noodles Bake 20-25 minutes in preheated 350 degree oven.

* * *

CREAMED ONIONS WITH DRIED BEEF

¼ pound package sliced dried beef
2 pounds small onions (about 18)
2 tablespoons butter or margarine
2 tablespoons flour
½ teaspoon salt
2 cups milk
1 cup bread crumbs
2 tablespoons butter or margarine

Peel onions and place in boiling salted water until tender, about 10 minutes. Drain. Place in 1½ quart baking dish. Melt 2 tablespoons butter in saucepan. Stir in flour and salt. Add milk gradually and stir until sauce thickens Cut dried beef into pieces. Cover with boiling water Drain immediately. Add dried beef to sauce. Pour sauce over onions. Combine bread crumbs and 2 tablespoons butter for topping. Sprinkle over top Bake in hot oven (425 degrees) 12 to 15 minutes until golden brown.

* * *

SMOKY CHEESE AND RICE BAKE

½ cup pitted ripe olives
¼ cup butter or margarine, melted
2 tablespoons flour
1 teaspoon salt
¼ teaspoon dry mustard
1½ cups milk
1 cup grated Cheddar cheese
8 smoky link sausages, cut in small pieces
2 tablespoons diced pimiento
2 cups cooked rice

RED ROSE FARM FEEDS

Mean GOOD FEEDING On Your Farm!

Feed is a major factor in the operation of a successful poultry or dairying business, and in hog and beef cattle raising. The kind, quality and balance of the nutrients in the feed used determine the eggs you will gather, and the milk, pork and beef you send to market.

RED ROSE FEEDS and SUPPLEMENTS, your layers, hogs, steers and dairy cows can be a MONEY-MAKING COMBINATION for you. Outstanding in quality, Red Rose Feeds and Supplements are efficient, modern feeds, formulated to contain all needed nutrients, vitamins and minerals, in properly balanced amounts . . . to produce the results you want, at a good profit.

In 1964 — choose to use Red Rose Feeds and Supplements on your farm.

cups corn flakes or ½ cup corn flake crumbs
Cut olives into large pieces. Measure 2 tablespoons butter; blend in flour, salt and mustard. Add milk gradually, stirring constantly. Cook until thickened, stirring occasionally Add cheese, sausage links and pimiento, rice and olives; mix lightly. Pour into greased shallow 1½ quart casserole. If using corn flakes, crush into fine crumbs; blend remaining butter; sprinkle over top. Bake in moderate oven (350 degrees) 25 minutes, or until thoroughly heated. Serve at once. 4 servings.

* * *

PARTY DREAM SALAD

1 package (8-ounces) cream cheese, softened
¼ cup dairy sour cream
1 tablespoon lemon juice
½ teaspoon salt
½ cup diced orange sections
½ cup halved maraschino cherries
½ cup coarsely chopped pecans
1 cup whipping cream, whipped
2 cups diced bananas
Maraschino cherries

In a small mixing bowl combine cream cheese, sour cream, lemon juice and salt; blend thoroughly Fold in orange sections, cherries, pecans and whipping cream. Gently fold in bananas. Spoon into mold; chill several hours To unmold, run knife around edge; turn onto serving plate and shake gently. Garnish with maraschino cherries. 6-8 servings.

* * *

JELLIED ORANGE-APPLESAUCE CUPS

2 oranges, peeled, diced (reserve juice)
2 tablespoons sugar
1 1-pound can applesauce (1⅞ cups)
⅓ cup thinly sliced red maraschino cherries with syrup
1 envelope unflavored gelatin
¾ cup fresh orange juice (or frozen)
1 tablespoon lemon juice
Salad greens
1 orange, peeled, sliced into cartwheels

Combine diced orange and juice, sugar, applesauce and maraschino cherries with syrup, in a mixing bowl Soften unflavored gelatin in orange juice and lemon juice, place over low heat and stir until gelatin is dissolved. Add to applesauce mixture Rinse 1 large mold or 6-8 individual molds in cold water. Spoon applesauce-orange mixture into molds Chill until firm. Unmold salads on crisp greens; garnish with orange half-cartwheels.

* * *

SNAPPY CRANBERRY TORTE

1 cup ground fresh cranberries
1 cup crushed pineapple
1 cup ground fresh apple
1 cup granulated sugar
22 gingersnaps
1½ cups confectioners' sugar
¼ cup butter or margarine
1 egg

Combine fruits and sugar. Let set 20 minutes and drain, reserving ¼ cup of the drained juice Pour the juice into a 10" glass pie plate Line

For the Farm Wife and Family

Ladies, Have You Heard? . . .

By: Jane Thurston, Extension Home Economist

THURSTON

When you drizzle honey, you get just the sweetness you wish, but a lot of thick honey makes any dish too sweet Warm honey is thin and drizzles perfectly To warm the honey, set the jar in warm water — not hot — about ten minutes before you're ready to use the honey When ready to flavor the food, the honey is just the right consistency to drizzle tiny threads instead of pouring a heavy stream

Warm honey drizzled over hotcakes or waffles or hot biscuits will meet with your family's approval

What You Can Do With Canned Peaches

Canned peaches lend themselves to a variety of uses, and you probably have your favorite ways to serve them Some other ways include

Mincemeat peaches make a delicious dessert — fill centers of canned peach halves with a spoonful of mincemeat Bake in a moderate oven about 20 minutes, basting several times during baking with orange juice Top each half with hard sauce or whipped cream

Broil canned peach halves and serve with a pork or beef roast To broil the peaches, drain the fruit and arrange in a shallow pan. Dot with butter and heat about 10 minutes or until lightly browned and heated through To serve with poultry, fill the centers with cranberry sauce

Preserve Your Health

Start the new year right with a few resolutions

Eat a well-balanced diet, including food from each of the four food groups . . . milk, meat, fruits, and vegetables, breads and cereals.

Don't overeat — overweight is a major health problem.

Relax after each meal

If your physician prescribes a special diet, follow it exactly.

Get some exercise every day, and be sure to get enough sleep

the bottom and sides of the plate with gingersnaps. Beat confectioners' sugar, butter and egg together until creamy. Spread over the gingersnaps. Top with the drained fruit Chill overnight or for several hours. Cut in wedges and serve.

NOTE: This dessert may be made in a 9x13" glass dish using broken gingersnaps to line the dish.

* * *

CRANBERRY REFRIGERATOR CAKE

2 cups fresh cranberries, chopped
1 large banana, diced
⅔ cup granulated sugar
2 cups crushed vanilla wafers
½ cup margarine or butter
1 cup confectioners' sugar
2 eggs
½ cup chopped nuts
1 cup whipping cream

Mix together chopped cranberries, banana, and granulated sugar Set aside while you prepare rest of recipe Place one-half of the crushed vanilla wafers in bottom of a 8 x 8" glass baking dish or pie pan Cream margarine and confectioners' sugar together, add eggs and beat well Spread this mixture over the crumbs Now top with a layer of the cranberry-banana mixture and sprinkle with the chopped nuts. Whip the cream until it peaks and spread over the cranberries and nuts Cover all with remaining crushed wafers and chill at least 4 hours before serving. The best flavor results if chilled overnight Serves 9-12 depending on size of piece

* * *

PLANTATION DESSERT

1½ cups sifted all-purpose flour
¾ teaspoon salt
½ teaspoon ginger
½ teaspoon cloves
½ teaspoon cinnamon
½ cup shortening
½ cup sugar
¾ teaspoon soda
½ cup molasses
1 egg, unbeaten
½ cup sour milk
2 3-ounce packages cream cheese
2 tablespoons milk

Sift together flour, salt, ginger, cloves, and cinnamon Cream shortening, sugar, and soda. Blend in molasses. Stir in ½ cup flour mixture. Beat in egg Add sour milk alternately with remaining flour mixture Beat ½ minute Turn into a well-greased and lightly floured 8 x 8 x 2-inch pan Bake in a moderate oven (350 degrees) 40 minutes When ready to serve, blend together cream cheese and milk Cut cake into squares; place spoonful cream cheese on top of each square Serve with a lemon sauce 9 servings.

SAVORY PRETZELS

1 7½ ounce package veri-thin pretzel sticks
1 8-ounce package veri-thin pretzels
½ cup butter or margarine
1 tablespoon garlic powder
2 3-ounce jars grated Parmesan cheese

Place pretzels and pretzel sticks into a roasting pan. Cut up butter or margarine into pieces and place on top. Sprinkle with garlic powder and Parmesan cheese. Bake in a slow oven (325 degrees) 10 to 15 minutes, shaking the pan occasionally to coat all the pretzels. Remove from oven. Cool. Store in airtight Makes 8 cups savory pretz

Farm Women 5 Holds Party

A song fest by the members highlighted the recent meeting of Farm Women Society 5 in the home of Mrs. Walter Holbein, Landisville

Mrs Esther Sauders presented a unique carol sing with the history and origin of carols The 26 members and their guests joined in the singing Miss Cindy Holbein presented recitations

The newly elected president, Mrs. Amanda Holbein, will represent the group at the state convention in Harrisburg next week Mrs Cora Earhart and Mrs Alverta Hess are alternates

Following the meeting a Christmas buffet was served and gifts were distributed Next meeting will be held at the home of Mrs. Pauline Longenecker, Manheim.

Ful-O-Pep Cattle-izer Dairy Feed
is the talk of dairymen everywhere

Here's why: In milk room after milk room, gleaming tanks are filled with evidence: more milk per cow . . . more milk per ton of feed.

Representing a new concept in dairy nutrition, Ful-O-Pep Cattle-izer Dairy Feed allows the cow to get as much as 20% more energy from the same amount of feed. This extra energy is used to produce more milk.

That's why North, South, everywhere . . . dairymen are talking, checking, and *feeding* new Ful-O-Pep Cattle-izer Dairy Feed.

Ask your neighbor about his results with Ful-O-Pep Cattle-izer

(Continued from Page 7)

have the making... for any special dessert if the fruit cake left over the holidays. Just crumble cake and moisten it with orange or pineapple juice. Layer with slightly sweetened and flavored whipped cream or softened ice cream in small dessert or sherbet dishes. Top with more whipped cream and a sprinkling of chopped nuts just before serving.

Some Ways To Serve Creamed Turkey Or Chicken

When you're making creamed turkey or chicken, you have a choice of ways to serve it. Here are several:

As topping for waffles, crisp buttered toast pointed, heated chow mein noodles, rice or plain noodles.

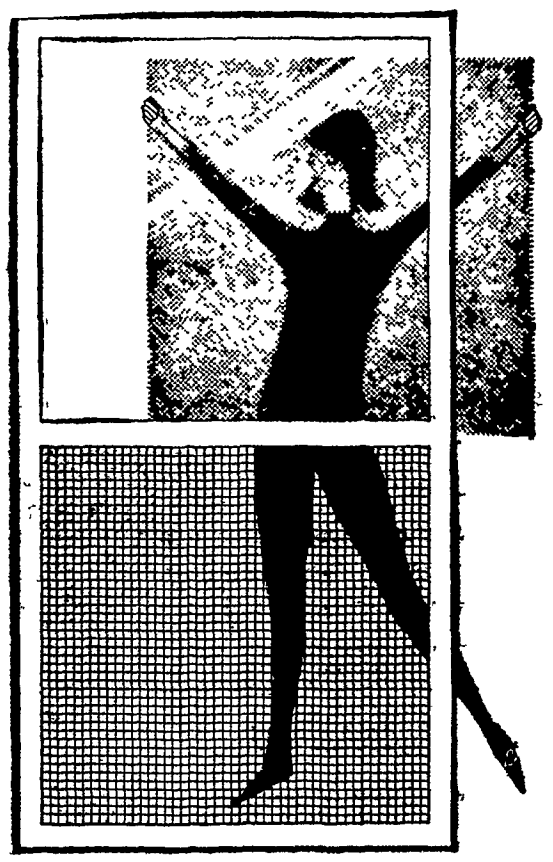
Serve in patty shells, noodle nests, toasted bread cups, or mashed potato nests.

Use as a filling for stuffed baked potatoes.

Serve between halves of biscuits or cornbread squares as shortcake.

No man is free who is not master of himself.

Your Alcoa neighbor helps you make the switch in a snap



The threaded fasteners that make screens and windows interchangeable on storm doors . . . the roofing nails that can't rust . . . the common nails, used with your aluminum siding . . . all these precise little parts are made by Alcoa to work for you every day in dozens of different ways.

Thousands of small-but-mighty products leave Alcoa/Lancaster each day and go on to every corner of the world. Some other products include solid and tubular rivets used in the construction of aircraft, boats and truck bodies. Electric cable accessories. And on and on the list goes.

They're all important parts, used in almost every product you can name. They're all made right here in Lancaster, primarily from aluminum wire, rod and bar. And they are made to the customer's order as well as stock.

This year, Alcoa/Lancaster marks the tenth year of serving customers all over the world—with products made by your neighbors, in Lancaster.

(One of a series on Lancaster Works products)

ALCOA

LANCASTER WORKS 10th Anniversary 1953-1963 / ALCOA 75th Anniversary 1888-1963

● 4-H Corn

(Continued from Page 1)

county's top contender for farm show honors. He has won the state Farm Show championship six times previously.

Trimble plowed down 11 tons of manure on a legume-grass sod, disced the field twice and harrowed and cultipacked once. He planted his hybrid corn on May 7 nine inches apart on 42 inch rows. He plowed down 100 pounds of 15-10-10 and added 250 pounds of 5-10-10 in the row at planting time.

Weeds were controlled with 2,4-D and one cultivation. His yield on the acre was 132.5 bushels.

Judge John Harris, Assistant Dauphin County Agent, put the reserve championship on the 10 ear exhibit of Annette Long, Daughter of Mr. and Mrs. Melvin Long, Lititz R3.

Miss Long had the high project score in the contest with 97 out of a possible 100 points. Gary Porter, Washington Boro R1, had 95.9 points, and Jay Richard Bucher, Ephrata R1, scored 92.6. Trimble's overall project score was fourth at 90.9.

Other placings in the 15 exhibit show were as follows:

3, Gary Porter, 4 David Funk, Washington Boro R1, 5, Eugene Bollinger, Denver R2, 6, Larry Groff, Lititz R2, 7, Daryl Bollinger, Lititz R1, 8, James Houser, Lampeter, 9, J. Richard Buckwalter, 10, Joe Wivell, Columbia R1.

Poultry Producers Tip

Be sure that your feeders, waterers, and nests grow in numbers with your flock size, says Floyd W. Hicks, extension poultry specialist at The Pennsylvania State University.

Casual Clothing Trend

Emphasis on casual garments tends to decrease the money each persons spends for clothing, point out Penn State extension clothing specialists. Separates add variety and permit less costly replacements. As part of this casual trend, women's suits and housedresses are declining in popularity, while emphasis is given skirts, blouses, sweaters and slacks. For men, the trousers-and-sport coat combination continues to rate high, while suit sales decline. Two-thirds of all shirts bought are sport shirts, and short-sleeved dress shirts may be a current compromise.

GUERNSEY DISPERSAL

J. C. & D. H. McSparren, Drumore, Pa. Owners
THURSDAY, JAN. 9, 1964 — 12:30 Noon.
At the Ass'n. Sales Pav. 6 mi. E. of Lanc., Pa.
38 COWS — 8 BRED & 20 OPEN HEIFERS!
(Includes some Grades)
T. B. & Bangs' Accred. — Vacc. — Dehorned.
11 fresh or due in Jan., Feb., and March.

DHIA Average just completed 35.5 cows,
9656M - 479F
The 6 yr. ave. of this herd has been,
9217M - 451F

As you expect with that kind of an average, you can buy quite a few cows with 10,000 M record or more, in most cases with one or more decendents.

This herd has been culled consistenly, and only the sound animals will be offered in this sale.

All cows are by bulls of the Southeastern Art. Breed Coop., or are bred to their bulls.

Plan to be at the sale regardless of the weather. If it is a bad day those who attend undoubtedly will get some high producers at very reasonable figures.

NEW!
Hoffman
HPS
GRASSLAND SEED
FORMULAS
FOR
HAY • PASTURE • SILAGE

Investigate Hoffman HPS Formulas before you order alfalfa, clover or pasture seed for the spring of 1964!

Heavier yields, real economy, trouble-saving efficiency—these are only three of the key factors behind Hoffman's new HPS Grassland Seed Formulas for hay, pasture and silage. Now you can select from 13 carefully formulated Hoffman grassland seed mixtures the ones most exactly suited for your needs, your soil and climate conditions.

Careful study, testing, and evaluation have determined the scientific compounding of 13 "tailor-made" legume-grass formulas. Each is designed for specific situations. Each includes those varieties which, based on field experience and test work, will do the best job.

Before you plan your spring plantings, investigate Hoffman HPS Formulas. The right balance of varieties may make a sizable difference in your return from every acre. Hoffman HPS Formulas are ready-mixed, pre inoculated, and ready to sow. Ask your Hoffman Seed Man for details, or Phone 898-3421.

get big litters of HUSKY PIGS

A sow is a pig factory, she has the big job of producing and nursing two litters of pigs every year.

Like any other factory, she has to have the raw ingredients to produce the product (pigs) and to maintain the factory (her own body).

If she fails to get proper nutrition to do both these jobs, she may actually resorb some pigs into her system, causing you to lose pigs you'll never even see, or she may farrow weak, unthrifty litters.

Purina Sow Chow, a product of years of research, has what it takes to help the sow keep up her own body, farrow big litters and have plenty of milk to start 'em right. It comes as a supplement to your grain or as a complete sow ration. Ask for Purina Sow Chow at our store.

Disaster

(Continued from Page 1)

and the section of the county is declared a disaster area, farmers will be able to purchase corn at a reduced rate, Smith said.

Other members of the committee are Fred Seldomridge, County Agriculture Conservation and Stabilization committee chairman, and Richard Hoover County Supervisor of the Farmers Home Administration Miss Dorothy Neel is secretary

Farm Bureau

(Continued from Page 1)

would be profitable to our organization and after a lot of deliberation on the matter, your board of directors decided we should consolidate the Lancaster and Manheim operations into one and serve our patrons out of the Lancaster Facilities."

Business increases

In a report to the patrons Charles Burkins, General Manager and Heber Shelly, Assistant General Manager and Sales Manager, said total patron purchases during 1963 were $4,352,372 00, up $330,930 from 1962 The only division showing less volume in 1963 than in the previous year was twine. Volume of chick sales more than doubled during the year, fertilizer and lime purchased increased more than 1,000 tons, the highest increase on record, and feed, seed and petrolium products all showed substantial increases

Burkins noted that while gross income was up from the previous year, operating costs were also up some $51 506 leaving a net savings of $83,629 00 in 1963 compared to $93,615 in 1962 Burkins also noted that net worth of the cooperative at $1,501,325 00 went over $1½ million for the first time

Specialization Predicted

County Agent Max M Smith said, "I am inclined to think the days of the farmer with many incomes is on the way out"

He said he believes the trend toward specialization in farming will continue "We used to say 'Don't put all your eggs in one basket', but the day when a farmer can have a few cows and a few pigs and a few chickens, and perhaps some tobacco or tomatoes, and still be efficient is fast disappearing"

DIRECTORS OF THE Lancaster County F Bureau Cooperative Association, elected at the an meeting Tuesday at Quarryville are, left to r Willis Z. Esbenshade, Veryl Brown, Paul G. Her and Amos H. Funk. L. F. P

He said we must gear to produce a quality product in large volume He predicted that 1964 would see greater demand for food products because of a growing population, but he also believes that cost of production will go higher and net income will be reduced below present levels He said he believes money will be somewhat "tighter" in the new year because of depressed prices of farm products.

He suggested that farmers give more thought to long range planning, keep better records, test soil and fo develop a "yearn to lear order to keep up to date, stress quality of product

Directors Elected

Patrons re-elected four rectors for three year t They are as follows. Fro Northeastern District, W Z. Esbenshade, 1631 E shade Road, Lancaster; S eastern District, Veryl Br Peach Bottom, Northwe District, Paul G. Her Manheim R4, and South ern District, Amos H Millersville R1.
